

Albert Einstein

Physicist • 1879 - 1955

“ Imagination is more important than knowledge.

— Albert Einstein

WHO WAS HE?

Albert Einstein was a curious boy who was fascinated by a compass his father gave him, and who was slow to speak as a small child. He worked in a patent office and did physics in his spare time, imagining what it would feel like to ride on a beam of light. Those daydreams became the theory that changed how we understand time and space.

THINK ABOUT IT

Where does your mind wander when you are bored? What could you build or discover from one of those daydreams?
